General Description of Activity

The Department takes action at the Federal Energy Regulatory Committee (FERC) to protect the interest of Vermont ratepayers in many different proceedings. For example, the Department has been active at FERC in ensuring fairness in cost allocations for utility projects and in ensuring Vermont's interests are represented in New England transmission projects. The issues vary from quarter to quarter but it is crucial to Vermont consumers that the Public Service Department intervenes at FERC when necessary to ensure that the costs flowing back to Vermont ratepayers as a result of FERC activity and proceedings are true, accurate, just and reasonable. These costs are billed back to utilities based upon their pro rata share.
